Lower Back Conditions

March 6 - 10, 2023 (Mon - Fri), 9:00-17:00

Created by Arno L'Hermitte in 2001, OsteoThai is the meeting of Traditional Thai Massage and osteopathy, a bridge between East and West. It's a form of bodywork that combines extraordinary Thai massage techniques with the precise and gentle touch of osteopathy.

OsteoThai is practised on the floor; the patient wears light comfortable clothing. The practitioner uses not only his hands but also his feet, knees and elbows. This makes for a

rich and colourful approach. OsteoThai combines Traditional Thai Massage's varied and powerful stretches, using leverage techniques across muscles groups and its acupressure work on energy lines, with osteopathy's release of tissue tension and work on structural and joint mobility.

These 2 classes are intended for experienced, motivated and open minded practitioners in Traditional Thai massage.

The 1st course will be a general approach to the practice of OsteoThai. It will cover techniques in the articular, myofascial and visceral areas, where tissue listening and the realization of techniques require precision and attention.

The 2nd course will bring a special focus on the spine and mainly the lower back conditions in order to improve vertebrae mobility and bring back ease of movement.
